

Shine! Medications and Allergy Form for the Philly Project

Shine! Chaperones are not medical personnel. We are not trained to administer medications and cannot accept this responsibility. Shine Chaperones will do their best to help students self-administer medications if assistance is needed. Medication administration and safety are the student's responsibility. Please be sure that your child knows how and when to take any meds. The Philly Project may require that medications be kept in the possession of chaperones until administered by the student.

Name of Shine Student:

Medications student has with them that they will be self-administering:

Medication (e.g. Escitalopram)	Dosage (e.g. one 10mg pill)	Time(s) to be taken (e.g. Breakfast and Bedtime)
-----------------------------------	--------------------------------	---

Severe Allergies (if student has an epi-pen with them, please tell us below):
